PRODUCT DESCRIPTION

60 watt EarthTronics high lumen H.I.D replacement provides the flexibility to insure the correct light level desired in different applications. Select from 4000K or 5000K at installation with a simple twist with full omni-directional illumination. This 9000 lumen LED equals up to 150 watt H.I.D lamp replacement on a medium EX39 base type. A thermal sensor in the lamp activates during extreme heat conditions. Power to the corn cob LED is automatically reduced by up to 20% to cool the lamp down and maintain lamp life. This high lumen H.I.D replacement is ideal for retrofit opportunities in exterior wall packs, yard lights, post lights, parking lot shoe box fixtures and other site and security applications. Simply bypass the existing ballast by cutting the wires and connecting the 120-277V line voltage directly to the sockets. No ballast or external driver is required. These vertical corn cob LED lamps feature a 360° beam angle to produce omni-directional light output.
